Instructions for Authors

The Editorial Committee reserves the copyright to print any material and its total or partial reproduction, as well as the right to accept or reject submitted material from authors. It also reserves the right to make any editorial modification if required. In such event, the author of the submitted material will receive suggestions from academic evaluators for changes to be made throughout the article. If author(s) accept(s) the suggestions, the revised (or rewritten) article must be submitted with all changes made by the date fixed by the journal to guarantee its publication in the programmed issue.

The process to be followed for publishing an article in the journal

The article must be uploaded into the journal’s OJS website, see the guidelines for article submission in the Authors guide section in our website http://www.revistas.unal.edu.co/index.php/ingeinv/article/view/59291/56815. Any manuscript must be sent using journal’s template (6 pages length max.) and must be accompanied by the license agreement, addressed to the to the Editor-in-chief of the journal, Prof. Andrés Pavas. This license agreement should state that all authors involved in the article agree to submit it for consideration in Ingeniería e Investigación Journal.

Article and License templates are available on: http://www.revistas.unal.edu.co/index.php/ingeinv/index

Once an article has been received by the journal, the corresponding author will be notified by e-mail and the peer-review process will start. Following this evaluation, authors will then be notified whether their article has been accepted or not. If accepted, authors must deal with the respective corrections recommended by the evaluators and the Editorial Committee’s final decision.

Content

All articles being considered by the committee for possible publication in the Ingeniería e Investigación journal must consist of the following parts:

- Title, abstract and keywords must be written in Spanish and English. The title must clearly explain the contents of the article in question, written in normal title form and be preferably brief. The abstract should contain around 200 words in Spanish and English, as well as including the methods and materials used, results obtained and conclusions drawn.

- An Introduction must be given. It must describe article’s general purpose, including its main objective, referring to any previous work and the scope of the current article.

- Conclusions must be drawn. This section must provide the implication of the results found and their relationship to the proposed objective.

- Bibliographical references must be given (an explanation and example of how to set them out is given later on).

- Acknowledgements (Optional). These should be brief and mention any essential support received for carrying out the work being reported.

- Appendix (Optional).

Scientific and technological research articles must also include:

- Experimental development. This must be written giving sufficient details for the subject to be fully understood by readers, including descriptions of any procedures involved.

- Results. These must give a clear explanation and interpretation of the findings. If it is necessary, a brief, focused discussion about how given results can be interpreted.

It is required that the bibliographical references for all articles are included at the end of the article, given in alphabetical order of first authors' surnames and mentioned in the text and, since May 2014, it is asked that the authors use the American Psychological Association (APA) style for citation and references:

- Articles published in journals:

- Books:

  Author, A. A. & Author, B. B. (year). Title of work. Location: Publisher.

- Conference papers and symposium contributions:

- Theses or undergraduate projects:
